

DIANA GAKUYA

Software Engineer | Cross-Platform Development | AI & IoT Integration | DevOps Expertise

+254796022656 • deegakuya@gmail.com • 67827-00200, Nairobi, Kenya

Summary

Innovative and results-oriented Software Engineer skilled in Python, Java, JavaScript, Flutter, and Django, with experience across backend, frontend, and mobile development. Proficient in modern DevOps practices, cloud deployment, and debugging complex enterprise systems. Passionate about creating impactful ICT solutions that drive automation, scalability, and digital transformation.

Experience

Afrosoftware	Nairobi, Kenya
Software Engineer	11/2023 - Present
- Developing cross-platform entertainment and gaming products using React.js, Next.js, Node.js, Flutter, and Django - Contributing to design, development, and API integration in distributed teams - Maintaining CI/CD pipelines and source control using Git and Agile practices	
Spiro Kenya	Nairobi, Kenya
Operations Service App Developer	02/2025 - Present
- Improved operational efficiency by 30% through real-time fleet management system at Spiro Kenya. - Streamlined data processing to support 1000+ daily transactions in vehicle and station management. - Developed a Flutter and Java-based app managing 500+ vehicles, batteries, and stations at Spiro Kenya.	
Thinking Energy	Nairobi, Kenya
IoT Monitoring Platform	01/2025
- Enabled revenue growth of {15%} by designing AI-based smart metering prototype system, enhancing energy monitoring capabilities. - Data analytics - Implemented data analytics processing over 1 million data points to optimize IoT monitoring platform.	
Spiro Kenya	Nairobi, Kenya
Software Engineer	02/2025 - 09/2025
- Designed and maintained enterprise software for vehicle and battery inventory management across Kenya, Uganda, and Rwanda - Developed and documented Django REST APIs using Swagger for integrations - Improved payment reliability with AI-driven validation and asynchronous workflows - Deployed and containerized services using Docker and managed AWS infrastructure (EC2, RDS PostgreSQL, S3) - Implemented monitoring and alerting with Grafana and Loki - Co-developed the Operations Service App using Flutter and Java via Android Studio for real-time asset tracking	
Thinking Energy LLC	Nairobi, Kenya
Chief Technology Officer (CTO)	08/2024 - 01/2025
- Led technology strategy for a multi-sector firm in energy, IT, and construction - Directed development of AI- and re-enabled smart grid, cybersecurity, and monitoring solutions - Oversaw DevOps pipelines, data analytics dashboards, and IT system automation - Managed cross-functional teams in delivering renewable energy and smart infrastructure projects - Strengthened cybersecurity architecture and deployed cloud-based optimization systems	

Education

Moringa School	Nairobi, Kenya
Software Engineering Certificate	09/2023 - 08/2024
- Built real-world projects including Food Diary API, Calendar App, and Multiplayer Poker Game - Applied agile practices, pair programming, and debugging techniques	

Education

Udemy Online Course	Nairobi, Kenya
Web Development Bootcamp	08/2023 - 11/2023
• Mastered HTML, CSS, JavaScript, Node.js, React, and Express through practical web projects	
Moringa School	Nairobi, Kenya
Web Development Bootcamp - Udemy	08/2024
• Software Engineering - Moringa School	
• Web Development Bootcamp - Udemy	

Key Achievements

 Enhanced System Reliability Led team to improve system reliability by 30%.	 Product Development Success Developed and launched 3 cross-platform products.	 Optimized Deployment Time Reduced deployment time by 40% through optimizing CI/CD.
 AWS Infrastructure Management Managed AWS infrastructure for over 20 services and products.		

Projects

Operations Service App	Spiro Kenya
Developed a Flutter + Java-based enterprise system for managing vehicles, batteries, and stations.	
Food Diary API	09/2023 - 08/2024
Created a RESTful API integrating Nutritionix with authentication and analytics.	
Calendar App	09/2023 - 08/2024
Built a scheduling tool with reminders using React & Node.js.	
Multiplayer Poker Game	09/2023 - 08/2024
Developed an interactive browser-based game using React.	
IoT Monitoring Platform	Thinking Energy
Designed a prototype system integrating AI-based smart metering and data analytics.	
	08/2024 - 01/2025

Certification

Web Development Bootcamp — Udemy Online Course
Python Mega Course — Udemy Online Course
Full stack React Bootcamp — Udemy Online Course
Ultimate Microsoft Office — Udemy Online Course
Complete Digital Marketing Guide — Udemy Online Course
UI/UX Design Handoff to Development — Udemy Online Course
